
LOCAL OB/GYN OFFERS 3D AND 4D ULTRASOUNDS FOR PREGNANT PATIENTS

January 12, 2015 – Youngstown, OH – Dr. Rodney Hill, OB/GYN and owner of Associates in Women's Health of the Mahoning Valley, Inc., 1350 Fifth Avenue, Suite 324, is now providing three-dimensional and four-dimensional ultrasounds for his prenatal patients.

3D and 4D ultrasounds are an upgraded option to regular 2D ultrasounds. Similar to standard ultrasounds, sound waves are used to create an image of the infant in a mother's womb. 3D ultrasounds are different in that they show a three-dimensional image of the baby. Meanwhile, 4D ultrasounds show a baby's live activity during the procedure in a video-like format. Parents like 3D and 4D ultrasounds because the baby's face is clearly visible, while doctors like 3D and 4D ultrasounds because they show birth defects that may not show up on a normal ultrasound. "I am excited to offer 3D and 4D technology to patients here in the Mahoning Valley. From an OB/GYN perspective, it is important to get a quality ultrasound in order to evaluate the total health of the baby," says Dr. Hill.

Associates in Women's Health of the Mahoning Valley, Inc. is a female health care provider in Youngstown, Ohio specializing in obstetrics and gynecology.
